Angle Bisector Constructions

Name : _____ Score : _____
 Teacher : _____ Date : _____

Constructing Altitudes of Triangles

How to construct an altitude from any vertex:
 Extend the line of the side opposing a vertex, and line up the span of the compass to any point on this side.
 Rotating the compass, make two marks where the span of the compass intersects the side opposing the vertex.
 At each of the two marks that intersect the side, using any span on the compass, rotate the compass outwards.
 Line up a ruler from a vertex through where the outer arcs meet. Draw a line from the vertex to the opposing side.
 Repeat for the other vertices and plot the point where all three altitudes meet. This is the orthocenter/concurrence point.

Locate the orthocenter of each triangle.

For each triangle, construct all three altitudes to show they are concurrent.

1.1 Perpendicular and Angle Bisectors

Name: _____

Examples

Perpendicular bisector: A line _____ is a segment of line _____

Example: Draw \overline{CD} . Construct the perpendicular bisector \overline{EF} .

Angle bisector: A _____ that divides an angle into two congruent _____

Example: Draw $\angle CDE$. Draw \overline{EF} bisecting the angle bisector.

Equivalent: When applied to the same _____, figures are more objects.

Angle Bisector

1) Draw $\triangle ABC$ with $\angle C = 90^\circ$.

2) Draw \overline{AD} bisecting $\angle A$. Draw \overline{DE} bisecting $\angle C$.

3) Draw \overline{BE} bisecting $\angle B$. Draw \overline{DE} bisecting $\angle C$.

4) Draw \overline{AD} bisecting $\angle A$.

5) Draw \overline{AD} bisecting $\angle A$.

1. Every point on the _____ of a segment is equidistant from the _____ of that segment.

[2-5] Use the figure to the right to answer the set of questions.

2. a) What is the relationship between \overline{AC} and \overline{BD} ?

b) What is the value of x ?

c) Find AB .

d) Find BC .

3. a) From the information given in the figure, how is \overline{TV} related to \overline{SU} ?

b) Find TS .

c) Find TV .

d) Find SU .

4. a) \overline{MO} is the perpendicular bisector of _____.

b) Find MP .

c) Find NO .

d) Find NP .

5. a) _____ is the perpendicular bisector of segment _____.

b) What are the lengths of \overline{EF} and \overline{EH} ?

c) Find the value of y .

d) Find $m\angle GEH$ and $m\angle GEF$.

Name : _____ Score : _____
Teacher : _____ Date : _____

Triangle Angle Bisectors

Each triangle has one of its angle bisectors drawn.

1) $m\angle DFR = 55^\circ$. Find $m\angle 1$.

$m\angle 1 = \underline{\hspace{2cm}}^\circ$

2) Find $m\angle NXE$. If $m\angle 1 = 25^\circ$

$m\angle NXE = \underline{\hspace{2cm}}^\circ$

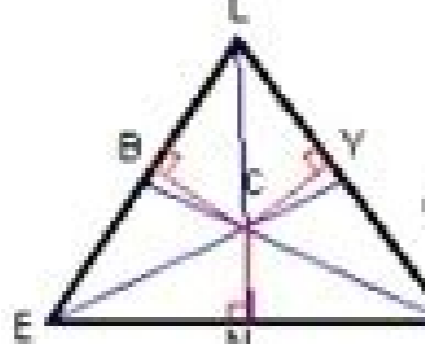

Each triangle shows its three angle bisectors intersecting at point C.

3) $CI = 8$ and $CZ = 17$. Find ZI .

$ZI = \underline{\hspace{2cm}}$

4) $NP = 13$ and $CN = 6$. Find CP .

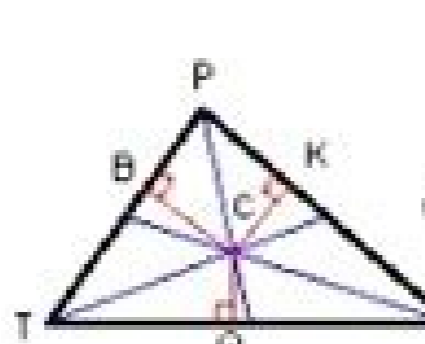

$CP = \underline{\hspace{2cm}}$

5) $JY = 10$ and $CJ = 4$. Find CY .

$CY = \underline{\hspace{2cm}}$

6) $QJ = 16$ and $CQ = 4$. Find CJ .

$CJ = \underline{\hspace{2cm}}$

7) $CJ = 18$. Find CX .

$CX = \underline{\hspace{2cm}}$

8) $CM = 3$ and $CA = 11$. Find AM .

$AM = \underline{\hspace{2cm}}$
